## THE MISSION

To mold the material received into educated gentlemen, thoroughly indoctrinated with honor, uprightness and truth, with practical rather than academic minds, with thorough loyalty to country, with a ground-work of educational fundamentals upon which experience afloat may build the finished naval officer, capable of upholding, whenever and wherever may be necessary, the honor of the United States; and withal giving due consideration that healthy minds in healthy bodies are necessities for the fulfillment of the individual missions of the graduates; and that fullest efficiency under this mission can only be attained if, through just and humane yet firm discipline, the graduates carry into the service respect and admiration for this academy.

# THE UNITED STATES NAVAL ACADEMY

---

The United States Naval Academy was founded in 1845 by the Hon. George Bancroft, Secretary of the Navy, in the administration of President James K. Polk. It was formally opened October 10 of that year under the name of the Naval School, with Commander Franklin Buchanan as superintendent. It was placed at Annapolis, Md., on the land occupied by Fort Severn, which was given up for the purpose by the War Department by the Hon. William L. Marcy, then Secretary of War. The course was fixed at five years, of which only the first year and the last were spent at the school, the intervening three years being passed at sea. This arrangement was not strictly adhered to, the exigencies of the service making it necessary, in many cases, to shorten the period of study. In January, 1846, four months after the opening of the school, the students consisted of 36 midshipmen of the date of 1840, who were preparing for the examination for promotion; 13 of the date of 1841, who were to remain until drafted for service at sea; and 7 acting midshipmen appointed after September of the previous year. The midshipmen of the date of 1840 were the first to be graduated, finishing their limited course in July, 1846, and they were followed in order by the subsequent dates until the reorganization of the school in 1850.

In September, 1849, the following board was appointed to revise the plan and the regulations of the Naval School:

Commander William B. Shubrick.  
Commander Franklin Buchanan.  
Commander Samuel F. DuPont.  
Commander George P. Upshur.  
Surg. W. S. W. Ruschenberger.  
Prof. William Chauvenet.  
Capt. Henry Brewerton, United States Army.

The plan reported by the board was approved and went into operation July 1, 1850. The new organization provided for a course of seven years, the first two and the last two at the school and the three intermediate years at sea. The school was placed under the supervision of the Bureau of Ordnance and Hydrography and its name was changed to the United States Naval Academy. The corps of professors was enlarged, the course was extended, and the system of separate departments with executive heads was fully adopted. It was provided that a Board of Visitors should make an annual inspection of the academy and report upon its condition to the Secretary of the Navy. A suitable vessel was attached to the academy as a practice ship and the annual practice cruises were begun.

After the system had been in operation a year new changes were proposed and the recommendations of the academic board on the subject were referred to the board of examiners for the year 1851, composed of the following-named officers:

Commodore David Conner.  
Capt. Samuel L. Breese.  
Commander C. K. Stribling.  
Commander A. Bigelow.  
Commander Franklin Buchanan.  
Lieut. Thomas T. Craven.

The change recommended by the board of examiners and adopted by the department consisted mainly in leaving out the requirement of three years of sea service in the middle of the course, thus making the four years of study consecutive. The practice cruise supplied the place of the omitted sea service and gave better opportunities for training. The change went into operation in November, 1851, together with other improvements recommended by the board. This system has been continued, with some slight modifications, to the present time. The first class to receive the benefit of it was that which entered in 1851. Six members of this class completed the course in three years and were graduated in June, 1854; the remainder of the class followed in 1855.

In May, 1861, on the outbreak of the war, the academy was moved to Newport, R. I. The three upper classes were detached and ordered to sea and the remaining acting midshipmen were quartered in the Atlantic House and on board the frigates *Constitution* and *Santee*. In the summer of 1865 the academy was brought back to Annapolis, where it has since remained.

When the Bureau of Navigation was established, July 5, 1862, the academy was placed under its supervision; March 1, 1867, it was placed under the direct care and supervision of the Navy Department, the administrative routine and financial management still being conducted through the bureau. On the 11th of March, 1869, this official connection with the bureau ceased, but was renewed by the general order of the Navy Department issued June 25, 1889.

The term of the academic course was changed by law March 3, 1873, from four to six years. The change took effect with the class that entered in the following summer.

In 1866 a class of acting third assistant engineers was ordered to the academy for instruction. The course embraced the subject of steam engineering mechanism, chemistry, mechanics, and practical exercises with the steam engine and in the machine shop. This class was graduated in June, 1868, together with two cadet engineers who had entered the academy in 1867. After an interval of four years, in October, 1871, a new class of cadet engineers was admitted. This class followed a two years' course, somewhat more extended than that of the class of 1868, and was graduated in 1873. In 1872 and 1873 new classes were admitted, the first of which left the academy in 1874 and the second in 1875. By an act of Congress approved February 24, 1874, the course of instruction for cadet engineers was made four years instead of two; the new provision was first applied to the class entering the academy in the year 1874. This class was graduated in June, 1878.

An act of Congress approved June 23, 1874, provides as follows:

*"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in all cases when it shall come to the knowledge of the Superintendent of the Naval Academy, at Annapolis, that any cadet midshipman or cadet engineer has been guilty of the offense commonly known as hazing, it shall be the duty of said superintendent to order a court-martial, composed of not less than three commissioned officers, who shall minutely examine into all the facts and circumstances of the case and make a finding thereon; and any cadet midshipman or cadet engineer found guilty of said offense by said court shall, upon recommendation of said court, be dismissed; and such finding, when approved by said superintendent, shall be final; and the cadet so dismissed from said Naval Academy shall be forever ineligible to reappointment to said Naval Academy."*

By an act of Congress approved August 5, 1882, it was provided that from that date "there shall be no appointments of cadet midshipmen or cadet engineers at the Naval Academy, but in lieu thereof naval cadets shall be appointed from each congressional district and at large, as now provided by law for cadet

midshipmen, and all the undergraduates at the Naval Academy shall hereafter be designated and called 'naval cadets,' and from those who successfully complete the six years' course appointments shall hereafter be made as it is necessary to fill vacancies in the lower grades of the Line and Engineer Corps of the Navy and of the Marine Corps: *And provided further*, That no greater number of appointments into these grades shall be made each year than shall equal the number of vacancies which has occurred in the same grades during the preceding year; such appointments to be made from the graduates of the year, at the conclusion of their six years' course, in order of merit, as determined by the academic board, of the Naval Academy; the assignment of the various corps to be made by the Secretary of the Navy, upon the recommendation of the academic board. But nothing herein contained shall reduce the number of appointments from such graduates below ten in each year, nor deprive of such appointment any graduate who may complete the six years' course during the year eighteen hundred and eighty-two. And if there be a surplus of graduates, those who do not receive such appointment shall be given a certificate of graduation, an honorable discharge, and one year's sea pay, as now provided by law for cadet midshipmen; and so much of section fifteen hundred and twenty-one of the Revised Statutes as is inconsistent herewith is hereby repealed.

"That any cadet whose position in his class entitles him to be retained in the service may, upon his own application, be honorably discharged at the end of four years' course at the Naval Academy, with a proper certificate of graduation."

In 1886 a special course of instruction in physiology and hygiene was established, in accordance with an act of Congress approved May 20 of that year.

The act of Congress approved March 2, 1889, provides that "the academic board of the Naval Academy shall on or before the thirtieth day of September in each year separate the first class of naval cadets then commencing their fourth year into two divisions, as they may have shown special aptitude for the duties of the respective corps, in the proportion which the aggregate number of vacancies occurring in the preceding fiscal year ending on the thirtieth day of June in the lowest grade of commissioned officers of the Line of the Navy and Marine Corps of the Navy shall bear to the number of vacancies to be supplied from the academy occurring during the same period in the lowest grade of commissioned officers of the Engineer Corps of the Navy; and the cadets so assigned to the Line and Marine Corps division of the first class shall thereafter pursue a course of study arranged to fit them for service in the Line of the Navy, and the cadets so assigned to the Engineers Corps division of the first class shall thereafter pursue a separate course of study arranged to fit them for service in the Engineer Corps of the Navy, and the cadets shall thereafter, and until final graduation at the end of their six years' course, take rank by merit with those in the same division according to the merit marks; and from the final graduates of the Line and Marine Corps division, at the end of their six years' course, appointments shall be made hereafter as it shall be necessary to fill vacancies in the lowest grades of commissioned officers of the Line of the Navy and Marine Corps; and the vacancies in the lowest grades of the commissioned officers of the Engineers Corps of the Navy shall be filled in like manner by appointments from the final graduates of the engineer division at the end of their six years' course: *Provided*, That no greater number of appointments into the said lowest grades of commissioned officers shall be made each year than shall equal the number of vacancies which shall have occurred in the same grades during the fiscal year then current; such appointments to be made from the final graduates of the year, in the order of merit as determined by the academic board of the Naval Academy, the assignment to be made by the Secretary of the Navy upon the recommendation of the academic board at the conclusion of the fiscal year then current; but nothing contained herein

or in the naval appropriation act of August fifth, eighteen hundred and eighty-two, shall reduce the number of appointments of final graduates at the end of their six years' course below twelve in each year to the Line of the Navy and not less than two shall be appointed annually to the Engineer Corps of the Navy, nor less than one annually to the Marine Corps; and if the number of vacancies in the lowest grades aforesaid occurring in any year shall be greater than the number of final graduates of that year the surplus vacancies shall be filled from the final graduates of the following years as they shall become available.

"That after the fourth day of March, eighteen hundred and eighty-nine, the minimum age of admission of cadets to the academy shall be fifteen years and the maximum age twenty years."

In October, 1897, a postgraduate course in naval architecture for the education of officers for the Construction Corps of the Navy was established; and a class was formed from the naval cadets that had finished the four years' course in that year.

By an act of Congress approved March 3, 1899, "the officers constituting the Engineer Corps of the Navy" were transferred to the "Line of the Navy," thereby repealing so much of the act of Congress approved March 2, 1889, as relates to the separation of naval cadets of the first class into line and engineer divisions.

This same act having limited the number of constructors in the Navy to 40, the postgraduate course in naval architecture was discontinued.

By an act of Congress approved June 7, 1900, it was provided that—

"Whenever any naval cadet shall have finished four years of his undergraduate course of six years the succeeding appointment may be made from his congressional district or at large in accordance with the existing law."

By an act of Congress approved July 1, 1902, it was provided that—

"The title 'naval cadet' is hereby changed to 'midshipman.'"

"That until the year nineteen hundred and fourteen, in addition to the naval cadets now authorized by law (the title having been changed by this act to midshipmen), the President shall appoint five midshipmen, and there shall be appointed from the States at large, upon the recommendation of Senators, two midshipmen for each State."

By an act of Congress approved March 3, 1903, it was provided that—

"There shall be allowed at the Naval Academy two midshipmen for each Senator, Representative, and Delegate in Congress, two for the District of Columbia, and five each year at large: *Provided*, That the additional congressional appointments authorized by this act shall be made at such time as may be determined by the Secretary of the Navy, who shall equitably distribute the increase among the several States, Districts, and Territories, so that ultimately, if practicable, each Senator, Representative, and Delegate may recommend for appointment during each Congress one midshipman: *Provided further*, That Members of the Fifty-seventh Congress who will not be Members of the Fifty-eighth Congress, and in whose districts or States appointments have not been made or vacancies filled in the Fifty-seventh Congress, may immediately upon the passage of this act make the additional appointments herein provided for.

"The Secretary of the Navy shall, as soon as practicable after the fifth day of March in each year, notify in writing each Senator, Representative, and Delegate in Congress of any vacancy which may be regarded as existing in the State, District, or Territory which he represents, and the nomination of a candidate to fill such vacancy shall be made upon the recommendation of the Senator, Representative, or Delegate. Such recommendations shall be made by the first day of June of that year, and if not so made the Secretary of the Navy shall fill the vacancy by the appointment of an actual resident of the State, District, or Territory in which the vacancy exists, who shall have been for at least two years

immediately preceding his appointment an actual bona fide resident of the State, District, or Territory in which the vacancy exists and shall have the qualifications otherwise prescribed by law: *And provided further*, That the Superintendent of the Naval Academy shall make such rules, to be approved by the Secretary of the Navy, as will effectually prevent the practice of hazing; and any cadet found guilty of participating in or encouraging or countenancing such practice shall be summarily expelled from the academy, and shall not thereafter be reappointed to the Corps of Cadets or be eligible for appointment as a commissioned officer in the Army or Navy or Marine Corps until two years after the graduation of the class of which he was a member.

"That the provision of this act for the increase of appointments of midshipmen to the Naval Academy shall continue in force until the thirtieth day of June, nineteen hundred and thirteen; and thereafter one midshipman, as now provided by law, shall be appointed for each Senator, Representative, and Delegate in Congress.

"That hereafter there shall be at the Naval Academy one midshipman from Porto Rico, who shall be a native of said island, and whose appointment shall be made by the President on the recommendation of the Governor of Porto Rico.

"That after January first, nineteen hundred and four, all candidates for admission to the Naval Academy at the time of their examination must be between the ages of sixteen and twenty years."

"All candidates for admission into the academy shall be examined according to such regulations and at such stated times as the Secretary of the Navy may prescribe. Candidates rejected at such examination shall not have the privilege of another examination for admission to the same class, unless recommended by the board of examiners." (R. S. sec. 1515.)

"When any candidate who has been nominated upon the recommendation of a Member or Delegate of the House of Representatives is found, upon examination, to be physically or mentally disqualified for admission, the Member or Delegate shall be notified to recommend another candidate, who shall be examined according to the provisions of the preceding section." (R. S. sec. 1516.)

An act of Congress approved April 9, 1906, reads as follows:

"AN ACT Granting authority to the Secretary of the Navy, in his discretion, to dismiss midshipmen from the United States Naval Academy and regulating the procedure and punishment in trials for hazing at the said academy.

*"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That it shall be the duty of the Superintendent of the United States Naval Academy, whenever he shall believe the continued presence of any midshipman at the said academy to be contrary to the best interests of the service, to report in writing such fact, with a full statement of the facts upon which are based his reasons for such belief, to the Secretary of the Navy, who, if after due consideration of the said report he shall deem the superintendent's said belief reasonable and well founded, shall cause a copy of the said report to be served upon the said midshipman and require the said midshipman to show cause in writing and within such time as the said Secretary shall deem reasonable, why he should not be dismissed from the said academy; and after due consideration of any cause so shown the said Secretary may, in his discretion, but with the written approval of the President, dismiss such midshipman from the said academy. And the truth of any issue of fact so raised, except upon the record of demerit, shall be determined by a board of inquiry convened by the Secretary of the Navy under the rules and regulations for the government of the Navy.

"SEC. 2. That so much of the acts approved June twenty-third, eighteen hundred and seventy-four, and March third, nineteen hundred and three, as requires the Superintendent of the United States Naval Academy to convene a court-martial in all cases when it shall come to the knowledge of the said superintendent that any midshipman has been guilty of the offense commonly known as 'hazing,' and declares the finding of a court-martial so convened, when approved by the said superintendent, final, and directs that any midshipman found guilty by such court-martial shall be summarily dismissed from the said academy, and also all other acts or parts of acts inconsistent with the present act, are hereby repealed, and that the offense known as 'hazing' may hereafter be proceeded against, dealt with, and punished as offenses against good order and discipline and for violation and breaches of the rules of said academy. But no midshipman shall be dismissed for a single act of hazing except under the provisions of section three of this act.

"SEC. 3. That the Superintendent of the United States Naval Academy may, in his discretion, and with the approval of the Secretary of the Navy, cause any midshipman in the said academy to be tried by court-martial for the offense of hazing, as provided by the act approved June twenty-third, eighteen hundred and seventy-four, and such court-martial, upon conviction, may sentence such midshipman to any punishment authorized by the said act or by the act approved March third, nineteen hundred and three, or authorized for any violation or breach of the rules of the said academy by the said rules, or in cases of brutal or cruel hazing, may, in addition to dismissal, sentence such midshipman to imprisonment for a period not exceeding one year: *Provided*, That such midshipman shall not be confined in a military or naval prison or elsewhere with men who have been convicted of crimes or misdemeanors; and such finding and sentence shall be subject to review by the convening authority and by the Secretary of the Navy, as in the cases of other courts-martial.

"SEC. 4. That the offense of 'hazing,' as mentioned in this act, shall consist of any unauthorized assumption of authority by one midshipman over another midshipman whereby the last-mentioned midshipman shall or may suffer or be exposed to suffer any cruelty, indignity, humiliation, hardship, or oppression, or the deprivation or abridgement of any right, privilege, or advantage to which he shall be legally entitled.

"SEC. 5. That it shall be the duty of every professor, assistant professor, academic officer, or any cadet officer or cadet petty officer, or instructor, as well as every other officer stationed at the United States Naval Academy, to promptly report to the superintendent thereof any fact which comes to his attention tending to indicate any violation by a midshipman or midshipmen of any of the provisions of this act or any violation of the regulations of the said academy. Any naval officer attached to the academy who shall fail to make such report as provided in this section shall be tried by court-martial for neglect of duty, and, if convicted, he shall be dismissed from the service. Any civilian instructor attached to the academy who shall fail to make such report as provided in this section shall be dismissed by the superintendent of the academy upon the approval of the Secretary of the Navy.

"SEC. 6. That this act shall take effect from the date of its approval, but no midshipman now connected with the United States Naval Academy shall, by reason of its enactment, be punished for any offense heretofore committed otherwise than in pursuance of the sentence of a court-martial if by existing law such sentence would be now necessary for such punishment) or punished more severely than is now by law allowed for any offense heretofore committed: *Provided*: That any midshipman now in said Naval Academy may waive his right to trial by court-martial under existing law for any offense of hazing here-

tofore committed and may accept punishment under the provisions of section two of this act."

By an act of Congress June 29, 1906, it was provided that—

"Hereafter, the Secretary of the Navy shall, as soon as possible after the first day of June of each year preceding the graduation of the midshipmen on the succeeding year, notify in writing each Senator, Representative, and Delegate in Congress of any vacancy that will exist at the Naval Academy because of such graduation, or that may occur for other reasons, and which he shall be entitled to fill by nomination of a candidate and one or more alternates therefor. The nomination of a candidate and alternate or alternates to fill said vacancy shall be made upon the recommendation of the Senator, Representative, or Delegate, if such recommendation is made by the fourth day of March of the year following that in which said notice in writing is given, but if it is not made by that time the Secretary of the Navy shall fill the vacancy by appointment of an actual resident of the State, congressional district, or Territory, as the case may be, in which the vacancy will exist, who shall have been for at least two years immediately preceding the date of his appointment an actual and bona fide resident of the State, congressional district, or Territory in which the vacancy will exist, and of legal qualification under the law as now provided. In cases where by reason of a vacancy in the membership of the Senate or House of Representatives or by the death or declination of a candidate for admission to the academy there occurs or is about to occur at the academy a vacancy from any State, district, or Territory that can not be filled by nomination as herein provided, the same may be filled as soon thereafter and before the final entrance examination for the year as the Secretary of the Navy may determine. The candidates allowed for the District of Columbia and all candidates appointed at large, together with alternates therefor, shall be selected by the President within the period herein prescribed for nomination of other candidates: *Provided*, That the President may select a candidate for the District of Columbia for the year nineteen hundred and eight.

"No person shall be admitted for instruction at the Naval Academy at Annapolis from any foreign country except upon authority of law hereafter enacted."

By an act of Congress approved March 7, 1912, it was provided—

"That the course at the Naval Academy shall be four years, and midshipmen on graduation shall be commissioned ensigns: *Provided*, That midshipmen now performing two years' service at sea in accordance with existing law shall be commissioned forthwith as ensigns from the date of the passage of this act: *And provided*, That those midshipmen of the class which was graduated in nineteen hundred and nine, who have completed two years' service afloat, and who are due for promotion, shall be commissioned ensigns to take rank with the other members of their class, according to their standing as determined by their final multiples, respectively, for the six years' course, from the fifth day of June, nineteen hundred and eleven, the date of rank to which they were entitled prior to the passage of this act: *And provided further*, That no back pay or allowances shall result by reason of the passage of this act."

The class graduating from the Naval Academy June, 1912, was the first class to be graduated as ensigns.

By an act of Congress approved July 9, 1913, it was provided—

"That after June thirtieth, nineteen hundred and thirteen, and until June thirtieth, nineteen hundred and nineteen, there shall be allowed at the Naval Academy two midshipmen for each Senator, Representative, and Delegate in Congress, one for Porto Rico, two for the District of Columbia, and ten appointed each year at large: *Provided*, That the midshipmen on graduation shall be commissioned ensigns in the Navy or may be assigned by the Secretary of the Navy

to fill vacancies in the lowest commissioned grades of the Marine Corps or Staff Corps of the Navy."

By an act of Congress passed June 30, 1914, it was provided—

"Hereafter, in addition to the appointments of midshipmen to the United States Naval Academy as now prescribed by law, the Secretary of the Navy is allowed fifteen appointments annually from the enlisted men of the Navy who are citizens of the United States and not more than twenty years of age on the date of entrance to the Naval Academy, and who shall have served not less than one year as enlisted men on the date of entrance: *Provided*, That such appointments shall be made in the order of merit from candidates who have in competition with each other passed the mental examination now or hereafter required by law for entrance to the Naval Academy, and who passed the physical examination required before entrance under existing law."

An act of Congress approved February 15, 1916, reads as follows:

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That hereafter there shall be allowed at the United States Naval Academy three midshipmen for each Senator, Representative, and Delegate in Congress, one for Porto Rico, two for the District of Columbia, ten appointed each year at large, and fifteen appointed annually from enlisted men of the Navy, as now authorized by law.

"SEC. 2. That all acts or parts of acts inconsistent with the provisions of this act are hereby repealed."

Public Resolution, No. 7, Sixty-fourth Congress, approved February 15, 1916, provides as follows:

"*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That the Secretary of the Navy be, and he hereby is, authorized to permit Mr. Carlos Hevia y Reyes Gavilan, a citizen of Cuba, to receive instruction at the United States Naval Academy at Annapolis: *Provided*, That no expense shall be caused to the United States thereby, and that the said Carlos Hevia y Reyes Gavilan shall agree to comply with all regulations for the police and discipline of the academy, to be studious, and to give his utmost efforts to accomplish the course in the various departments of instruction, and that the said Carlos Hevia y Reyes Gavilan shall not be admitted to the academy until he shall have passed the mental and physical examinations prescribed for candidates from the United States, and that he shall be immediately withdrawn if deficient in studies, or conduct, and so recommended by the academic board."

An act of Congress approved August 29, 1916, provides as follows:

"Hereafter, in addition to the appointment of midshipmen to the United States Naval Academy, as now prescribed by law, the President is hereby allowed fifteen appointments annually instead of ten as now prescribed by law, and the Secretary of the Navy is allowed twenty-five appointments annually instead of fifteen as now prescribed by law, the latter to be appointed from the enlisted men of the Navy who are citizens of the United States, and not more than twenty years of age on the date of entrance to the Naval Academy, and who shall have served not less than one year as enlisted men on the date of entrance: *Provided*, That such appointments shall be made in the order of merit from candidates who have in competition with each other passed the mental examination now or hereafter required by law for entrance to the Naval Academy, and who passed the physical examinations required before entrance under existing laws.

"That hereafter the Secretary of the Navy is authorized to permit not exceeding four Filipinos, to be designated, one for each class, by the Governor General of the Philippine Islands, to receive instruction at the United States Naval Academy at Annapolis, Maryland: *Provided*, That the Filipinos undergoing

instruction, as herein authorized, shall receive the same pay, allowances, and emoluments, to be paid out of the same appropriations, and shall be subject to the same rules and regulations governing admission, attendance, discipline, resignation, discharge, dismissal, and graduation as are authorized by law and regulation for midshipmen appointed from the United States, but the Filipino midshipmen herein authorized shall not be entitled to appointment to any commissioned office in the United States Navy by reason of their graduation from the Naval Academy.

*“Provided further, That no midshipman at the United States Naval Academy or cadet at the United States Military Academy who fails to graduate therefrom shall be eligible for appointment as a commissioned officer in the Marine Corps until after the graduation of the class of which he was a member.”*

An act of Congress approved March 4, 1917, provides as follows:

*“Hereafter, in addition to the appointment of midshipmen to the United States Naval Academy, as now prescribed by law, the Secretary of the Navy is allowed one hundred appointments annually instead of twenty-five as now prescribed by law, to be appointed from the enlisted men of the Navy who are citizens of the United States, and not more than twenty years of age on the date of entrance to the Naval Academy, and who shall have served not less than one year as enlisted men on the date of entrance: Provided, That such appointments shall be made in the order of merit from candidates who have, in competition with each other, passed the mental examination now or hereafter required by law for entrance to the Naval Academy, and who passed the physical examination before entrance under existing laws.*

*“The President, in his discretion, is authorized to reduce the course of instruction at the Naval Academy from four to three years for a period of two years from the date of the approval of this act, and may during said two years graduate classes which have completed a three-year course.”*

An act of Congress approved April 25, 1917, reads as follows:

*“AN ACT To increase the number of midshipmen at the Naval Academy until September first, nineteen hundred and eighteen*

*“Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in addition to the number of midshipmen now authorized by law, there shall be appointed during the period from the date of passage of this act until September first, nineteen hundred and eighteen, one additional midshipman for each Senator, Representative, and Delegate in Congress. Nominations shall be made for these vacancies by the Senators, Representatives, and Delegates concerned for any regular or special examination that may be ordered before that date.”*

An act of Congress approved December 20, 1917, reads as follows:

*“Be it enacted by the Senate and House of Representatives of the United States of America Congress assembled, That hereafter there shall be allowed at the United States Naval Academy five midshipmen for each Senator, Representative, and Delegate in Congress, one for Porto Rico, two for the District of Columbia, fifteen appointed each year at large, and one hundred appointed annually from enlisted men of the Navy, as now authorized by law.*

*“SEC. 2. That all acts or parts of acts inconsistent with the provisions of this act are hereby repealed.”*

An act of Congress approved April 2, 1918, reads as follows:

*“Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the President be, and he is hereby, authorized, until August first, nineteen hundred and twenty-one, to reduce, in his discretion, the course of instruction at the United States Naval Academy from*

four to three years and to graduate classes which have completed such reduced courses of instruction."

The following classes were graduated in accordance with the act of Congress of April 2, 1918, authorizing a reduction in the course:

Class	Date graduated	Members graduated
1917 -----	Mar. 29, 1917	182
1918 -----	June 28, 1917	199
1919 -----	June 6, 1918	199
1920 -----	June 6, 1919	460
1921 (first half) -----	June 3, 1920	286

On June 6, 1919, the class of 1921 was divided, and the first half, according to general merit for the third-class year, became the first class and continued the three years' course; the second half became the second class and resumed the four years' course.

An act of Congress approved May 14, 1918, reads as follows:

"AN ACT To fix the age limits for candidates for admission to the United States Naval Academy

*"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That hereafter all candidates for admission to the Naval Academy must be not less than sixteen years of age nor more than twenty years of age on April first of the calendar year in which they enter the academy: Provided, That the foregoing shall not apply to candidates for midshipmen designated for entrance to the academy in nineteen hundred and eighteen."*

An act of Congress approved July 11, 1919, reads as follows:

"Section 1 of the act entitled 'An act to increase the number of midshipmen at the United States Naval Academy,' approved December 20, 1917, is hereby amended so as to read as follows: That hereafter there shall be allowed at the United States Naval Academy five midshipmen for each Senator, Representative, Delegate in Congress, and Resident Commissioner from Porto Rico, and five for the District of Columbia, fifteen appointed each year at large, and one hundred appointed annually from enlisted men of the Navy, and members of the Naval Reserve Force on active duty, as now authorized by law."

This act also provides that all midshipmen entering the Naval Academy subsequent to June 1, 1919, shall be allowed mileage, at 5 cents per mile, while proceeding from their homes to the Naval Academy for examination and appointment as midshipmen, and that the pay of midshipmen shall hereafter be \$780 per annum.

The following clause was contained in the deficiency act approved June 5, 1920:

"That until otherwise provided by law no midshipman found deficient at the close of the last and succeeding academic terms shall be involuntarily discontinued at the Naval Academy or in the service unless he shall fail upon reexamination in the subjects in which found deficient at an examination to be held at the beginning of the next and succeeding academic terms, and the Secretary of the Navy shall provide for the special instruction of such midshipmen in the subjects in which found deficient during the period between academic terms."

A clause in the naval appropriation bill, act of July 12, 1921, provides that a candidate for midshipman so desiring may receive a credit of \$250 upon entrance toward defraying the entering expenses.

## INSTRUCTIONS TO CANDIDATES FOR MIDSHIPMEN REGARDING ENTRANCE DEPOSIT

Each candidate who has qualified mentally and physically must, before being admitted as a midshipman, deposit with the midshipmen's storekeeper the sum of \$100, to be used in part payment to cover cost of uniforms, clothing, textbooks, etc. The amount deposited is not refunded but is expended for clothing and textbooks, which become the property of the midshipman.

Immediately after being admitted to the Naval Academy each new midshipman is credited with the sum of \$250, in accordance with an act of Congress dated July 12, 1921, which is needed in addition to the \$100 cash deposit referred to above to complete paying for the uniforms, clothing, textbooks, etc., required before a midshipman enters upon his studies. This amount is deducted from the midshipman's pay in monthly installments. Any midshipman may, however, immediately after entering the academy repay this amount in full from his own funds and thus obviate the necessity of having a certain amount deducted monthly from his pay for this purpose. It is urgently recommended that all those midshipmen financially able to do so make the repayment as soon as possible after entering the academy.

An act providing for the readmission of certain deficient midshipmen to the United States Naval Academy, approved October 22, 1921, reads as follows:

*"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Navy is authorized, upon application, to admit to and reinstate in the United States Naval Academy, subject to examination as to physical qualifications, as provided by law, but waiving the provisions of law as to age requirements, all former midshipmen at the United States Naval Academy found deficient at the end of the first term of the academic year 1920-21 whose resignations were asked for and received by the Superintendent of the Naval Academy: Provided, That they shall upon admission be placed in the class one year behind their former class in each case: Provided further, That said midshipmen affected by this act must signify their acceptance of the benefits thereof by presenting themselves for physical examination within one month of the date of its approval, and if found qualified will enter the Naval Academy immediately.*

"SEC. 2. That the clause in the act approved June 5, 1920 (Forty-first Statutes, p. 1028), entitled 'An act making appropriations to supply deficiencies in appropriations for the fiscal year ending June 30, 1920, and for other purposes,' which reads as follows: 'That until otherwise provided by law no midshipman found deficient at the close of the last and succeeding academic terms shall be involuntarily discontinued at the Naval Academy or in the service unless he shall fail upon reexamination in the subjects in which found deficient at an examination to be held at the beginning of the next and succeeding academic terms, and the Secretary of the Navy shall provide for the special instruction of such midshipmen in the subjects in which found deficient during the period between academic terms,' be, and the same hereby is, repealed, and section 1519 of the Revised Statutes restored to its full force and effect."

Public Resolution No. 72, Sixty-seventh Congress, approved September 18, 1922, provides as follows:

*"Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Navy be, and hereby is, authorized to permit Mr. Willem van Doorn, a subject of the Netherlands, to receive instruction at the United States Naval Academy at Annapolis: Provided, That no expense shall be caused to the United States thereby, and that the said Willem van Doorn shall agree to comply with all regulations for the police and discipline of the academy, to be studious, and to give his utmost efforts to accom-*

plish the course in the various departments of instruction, and that the said Willem van Doorn shall not be admitted to the academy until he shall have passed the mental and physical examinations prescribed for candidates from the United States, and that he shall be immediately withdrawn if deficient in studies or conduct and so recommended by the academic board."

An act of Congress approved January 22, 1923, reads as follows:

"That no part of this appropriation shall be available for the pay of any midshipmen whose admission, subsequent to the class entering the Naval Academy next after the approval of this act, would result in exceeding at any time an allowance of three midshipmen for each Senator, Representative, and Delegate in Congress; of one midshipman for Porto Rico, a native of the island, appointed on nomination of the governor, and of one midshipman from Porto Rico, appointed on the nomination of the Resident Commissioner; and of two midshipmen for the District of Columbia: *Provided further*, That nothing herein shall be construed to repeal or modify in any way existing laws relative to the appointment of midshipmen at large or from the enlisted personnel of the naval service."

An act of Congress approved May 28, 1924, reads as follows:

"That no part of this appropriation shall be available for the pay of any midshipmen whose admission subsequent to February 9, 1924, would result in exceeding at any time an allowance of three midshipmen for each Senator, Representative, and Delegate in Congress; of one midshipman for Porto Rico, a native of the island, appointed on nomination of the governor, and of two midshipmen from Porto Rico, appointed on nomination of the Resident Commissioner; and of two midshipmen for the District of Columbia: *Provided further*, That nothing herein shall be construed to repeal or modify in any way existing laws relative to the appointment of midshipmen at large or from the enlisted personnel of the naval service."

An act of Congress approved February 11, 1925, reads as follows:

"That no part of this appropriation shall be available for the pay of any midshipmen whose admission subsequent to December 13, 1924, would result in exceeding at any time an allowance of three midshipmen for each Senator, Representative, and Delegate in Congress; of one midshipman for Porto Rico, a native of the island, appointed on nomination of the governor, and of two midshipmen from Porto Rico, appointed on nomination of the Resident Commissioner; and of two midshipmen for the District of Columbia: *Provided further*, That nothing herein shall be construed to repeal or modify in any way existing laws relative to the appointment of midshipmen at large or from the enlisted personnel of the naval service."

An act of Congress approved February 28, 1925, reads as follows:

"That hereafter the Secretary of the Navy is authorized to appoint midshipmen to the Naval Academy from the enlisted men of the Naval Reserve and Marine Corps Reserve under similar conditions as prescribed by law for appointments from enlisted men of the Navy: *Provided*, That not more than twenty-five midshipmen shall be appointed in any one year under the authority contained in this section." (Sec. 8, Public No. 512—H. R. 9634.)

An act of Congress approved May 21, 1926, reads as follows:

"That no part of this appropriation shall be available, for the pay of any midshipmen whose admission subsequent to January 13, 1926, would result in exceeding at any time an allowance of three midshipmen for each Senator, Representative, and Delegate in Congress; of one midshipman for Porto Rico, a native of the island, appointed on nomination of the governor, and of three midshipmen from Porto Rico, appointed on nomination of the Resident Commissioner; and of two midshipmen for the District of Columbia: *Provided further*, That nothing herein shall be construed to repeal or modify in any way existing laws relative

to the appointment of midshipmen at large, from the enlisted personnel of the naval service or from the Naval Reserve: *And provided further*, That in computing for any purpose the length of service of any officer of the Navy, of the Marine Corps, of the Coast Guard, of the Coast and Geodetic Survey, or of the Public Health Service, who was appointed to the United States Naval Academy or to the United States Military Academy after March 4, 1913, the time spent at either academy shall not be counted."

An act of Congress approved June 8, 1926, reads as follows:

"That the number of cadets now authorized by law at the United States Military Academy, and the number of midshipmen now authorized by law at the United States Naval Academy, are each hereby increased by forty from the United States at large, to be appointed by the President from among the sons of officers, soldiers, sailors, and marines of the Army, Navy, and Marine Corps of the United States who were killed in action or died prior to July 2, 1921, of wounds or injuries received, or disease contracted in line of duty during the World War: *Provided*, That one-half shall be appointed from among the sons of officers, and one-half from among the sons of warrant officers, soldiers, sailors, and marines of the Army, Navy, and Marine Corps."

## SUPERINTENDENTS OF THE UNITED STATES NAVAL ACADEMY

	Assumed command
Commander Franklin Buchanan.....	Sept. 3, 1845
Commander George P. Upshur.....	Mar. 15, 1847
Commander Cornelius K. Stribling.....	July 1, 1850
Commander Louis M. Goldsborough.....	Nov. 1, 1853
Capt. George S. Blake.....	Sept. 15, 1857
Rear Admiral David D. Porter.....	Sept. 9, 1865
Commodore John L. Worden.....	Dec. 1, 1869
Rear Admiral Christopher R. P. Rodgers.....	Sept. 22, 1874
Commodore Foxhall A. Parker.....	July 1, 1878
Rear Admiral George B. Balch.....	Aug. 2, 1879
Rear Admiral Christopher R. P. Rodgers.....	June 13, 1881
Capt. Francis M. Ramsay.....	Nov. 14, 1881
Commander William T. Sampson.....	Sept. 9, 1886
Capt. Robert L. Phythian.....	June 13, 1890
Capt. Philip H. Cooper.....	Nov. 15, 1894
Rear Admiral Frederick V. McNair.....	July 15, 1898
Commander Richard Wainwright.....	Mar. 15, 1900
Capt. Willard H. Brownson.....	Nov. 6, 1902
Rear Admiral James H. Sands.....	July 1, 1905
Capt. Charles J. Badger.....	July 15, 1907
Capt. John M. Bowyer.....	June 10, 1909
Capt. John H. Gibbons.....	May 15, 1911
Capt. William F. Fullam.....	Feb. 7, 1914
Capt. Edward W. Eberle.....	Sept. 20, 1915
Capt. Archibald H. Scales.....	Feb. 12, 1919
Rear Admiral Henry B. Wilson.....	July 5, 1921
Rear Admiral Louis M. Nulton.....	Feb. 23, 1925

## BOARD OF VISITORS

---

### BY THE PRESIDENT

Mr. N. M. Hubbard, jr.  
Mr. Walter Bruce Howe.  
Mr. Stuart W. Cramer.  
Mr. W. W. Carnes.

Mr. Hunt Chipley.  
Mr. Nathaniel A. Elsberg.  
Rear Admiral David W. Taylor (C. C.),  
U. S. N. (retired).<sup>1</sup>

### BY THE VICE PRESIDENT

Honorable Frederick Hale.<sup>2</sup>  
Honorable Tasker L. Oddie.<sup>2</sup>  
Honorable William M. Butler.<sup>2</sup>

Honorable Edward I. Edwards.  
Honorable C. C. Dill.

### BY THE SPEAKER OF THE HOUSE

Honorable Thomas S. Butler.<sup>2</sup>  
Honorable Adam M. Wyant.  
Honorable Grant M. Hudson.

Honorable John Taber.  
Honorable Millard E. Tydings.  
Honorable Alfred L. Bulwinkle.<sup>2</sup>

Comdr. Benjamin Dutton, U. S. Navy.  
Secretary to Board of Visitors.

<sup>1</sup> President.

<sup>2</sup> Was not present.

## ACADEMIC CALENDAR, 1926-27

1926

September 24..... Beginning of first term..... Friday.

1927

January 31.....	Beginning of second term.....	Monday.
February 16.....	Examination of candidates.....	Wednesday.
April 20.....	Examination of candidates.....	Wednesday.
May 25.....	End of academic year 1926-27.....	Wednesday.
May 26 to June 2...	Graduation week.....	Thursday to Thursday.
June 2.....	Graduation day.....	Thursday.
June 3.....	Beginning of summer term.....	Friday.
September 22.....	End of summer term.....	Thursday.
September 23.....	Beginning of academic year 1927-28.....	Friday.

The academic months for 1926-27 will end as follows:

FIRST TERM		SECOND TERM	
October.....	October 23.	February.....	February 26.
November.....	November 20.	March.....	March 26.
December.....	December 18.	April.....	April 23.
January.....	January 29.	May.....	May 25.

THE HEAD OF THE DEPARTMENT OF ENGLISH.

THE HEAD OF THE DEPARTMENT OF MODERN LANGUAGES.

THE HEAD OF THE DEPARTMENT OF HYGIENE

THE HEAD OF THE DEPARTMENT OF PHYSICAL TRAINING.

## PRACTICE CRUISE, 1926

---

There was no regular Naval Academy practice squadron for the summer practice cruise, 1926.

Officers and midshipmen detailed for the practice cruise embarked on June 4, 1926, and disembarked August 27, 1926.

The midshipmen of the first, second, and third classes were assigned to the following ships of the Scouting Fleet: *Wyoming* (flagship), *New York*,<sup>1</sup> and *Utah*.

The itinerary of the midshipmen's practice cruise was as follows:

Place	Arrival	Departure	Place	Arrival	Departure
Annapolis-----	May 29	June 4	New York-----	July 2	July 6
Newport-----	June 11	June 15	Newport-----	July 7	July 15
Marblehead-----	June 16	June 19	Philadelphia-----	July 17	July 26
Portland-----	June 19	June 21	Guantanamo-----	Aug. 1	Aug. 21
Charleston-----	June 26	June 29	Annapolis-----	Aug. 26	

<sup>1</sup> Thirty-three reserve midshipmen from St. John's College, Annapolis, Md., were assigned to the U. S. S. New York.

## MERIT ROLLS FOR 1925-26

---

Merit rolls, made out annually for each class, show the proficiency of the midshipmen in each branch of study. The numbers given in the table, showing the relative weight of the different branches, are used as coefficients, the final mark in each branch (on a scale of 4) being multiplied by the number assigned to that branch. The sum of the products, after adding the multiple for discipline, is the final mark of the midshipmen for the year.

In the graduating merit roll the final standing for the course is determined by the sum of the yearly multiples.

Midshipmen who attain 85 per cent of the multiple for a year shall be distinguished by a star affixed to their names on the annual merit rolls. (Regulations, U. S. Naval Academy, 1923, par. 167.)

The diplomas of midshipmen whose final multiples on the graduating merit roll are not less than 85 per cent of the maximum shall read "Passed with distinction"; those whose final multiples are less than 85 per cent but not less than 75 per cent of the maximum shall read "Passed with credit"; and those whose final multiples are less than 75 per cent of the maximum shall read "Passed." (Regulations, U. S. Naval Academy, 1923, par. 168.)

\* Received 85 per cent of multiple.

*a* Completed course; commission withheld pending action on physical disability.

*b* Resignation accepted upon graduation due to physical disqualification.

*c* Sent on practice cruise on account of scholastic deficiency; later passed reexamination; graduated and commissioned.

*d* Did not graduate; found physically disqualified and required to resign.

*dd* Died.

*e* Diploma withheld; sent on practice cruise as disciplinary measure; later graduated and commissioned.

*f* Dismissed.

*g* Found physically disqualified and required to resign.

*h* Deficient in studies; turned back.

*i* Deficient in studies; required to resign.

*j* Sent on practice cruise for refusing to accept commission after receiving diploma; later commissioned.

*m* Deficient in studies, first term; turned back into this class.

MC Assigned to Marine Corps upon graduation.

*r* Resigned.

SC Assigned to Supply Corps upon graduation.

*w* Turned back into next lower class on account of illness.

*x* Deficient for first term; turned back into this class.

† Resigned; readmitted with class of 1930.

*Merit roll for the four years' course of the midshipmen of the graduating class (class of 1926), 457 members of whom 456 graduated*

Sunday	$\left. \begin{array}{l} 1, 3 \\ 2, 4 \end{array} \right\}$					{Study.

## NOTES

- (1) The fourth class program changes on August 30. In modern languages, the first and third companies study Spanish, the second and fourth companies study French. Assignments to each language on entrance become permanent for the entire course, and assignments of the fourth class to battalions in the regiment for the opening of the academic year are made from the company with the corresponding number.
- (2) During Part II of schedule odd numbered companies recite first hour of second and third periods until September 11, then even numbered companies recite first hour same periods.
- (3) Referring to Part II those companies that recite first hour of second period will on Monday, Tuesday, Thursday, and Friday march direct from department of E. & A. to the department of mathematics. The remaining companies will march to Bancroft Hall and there observe study hours.
- (4) Where a drill involving physical exercise is followed by a recitation period, the drill officer will dismiss in sufficient time for a bath and the necessary change of clothing or uniform required for the recitation.
- (5) There will be mass singing from 7.30 to 8 p. m. Monday and Thursday, from August 30 to September 24.
- (6) There will be a lecture on hygiene in Sampson Hall, fifth period, on July 20 and 27 and on September 10.

## SUMMER AVIATION COURSE, 1926—INSTRUCTION SCHEDULE

## COMMENT

(1) The regular four-year curriculum at the Naval Academy includes the theoretical subject: "Aerial Navigational Instruments," "Aviation Engines," and "Structure and Rigging," as well as practical work in the latter two subjects. Approximately one-half of the theoretical subjects: "Aerial Gunnery" and "Aerial Bombing" are also included. Theoretical subjects which are completed prior to taking the postgraduate summer course are "Aviation History," "Aerology," "Naval Aviation" (Warlick), and "Aircraft Communications." The latter includes blinker signaling and radio code practice, together with "procedure." Practically one-third of aerial navigation is completed in the four-year curriculum and the remainder will be given in Part II of summer course.

(2) The postgraduate instruction as outlined in the various schedules for the summer of 1926 will complete the course covered by the United States Naval Aviation Ground School Manual (Volumes I, II, and III), viz: "The Ground School Course" and "Ground Gunnery."

(3) Textbooks: The United States Naval Aviation Ground School Manual (Volumes I, II, and III), the Bureau of Aeronautics Manual, the Bureau of Navigation Training Courses "Seaman Signalman 3d C" and "Radioman 3d C," and official pamphlets of the Bureaus of Aeronautics, Engineering, and Ordnance.

## PART I—JUNE 6 TO 26

DEPARTMENTS.—Seamanship and flight tactics, engineering and aeronautics, ordnance and gunnery, electrical engineering and physics.  
SUBJECTS.—Scouting; aviation engines; test stand; structure and rigging; aerial gunnery and bombing, and practical work in both; theory of flight, aircraft radio instruments; radio code practice.

<sup>1</sup> See Section room assignments.

## NOTES

(1) \*Study hours will be observed on Sundays from 8 p. m. to 9.30 p. m. Each department concerned will issue its own Section Lists and Room Assignments (12 to 15 students to a section), its own lesson assignments and such other detailed instructions as may be necessary.

(2) The Executive Department will carry out the routine so far as formations and study periods in Bancroft Hall are concerned and have charge of all activities not included in the above schedule.

## SUMMER AVIATION COURSE, 1926—INSTRUCTION SCHEDULE

## PART II—JUNE 28 TO AUGUST 14

**KEY TO ABBREVIATIONS.**—*Radio code*.—Radio code practice and communication procedure (Sampson Hall). *Flight*.—Instruction during flight in seaplane (H-16 or F-5-L) as observer in the duties of (1) mechanic, (2) gunner, (3) navigator, and (4) radio man. *Range*.—Range gunnery course on rifle range. *Test stand*.—Practical work at engine test stand. *Eng. over*.—Practical work in engine overhaul. *S. & E.*.—Practical work in structure and rigging. *S. or Study*.—Period assigned to general study. *S. (-) or Study (-)*.—Study assignment No. — as per department instructions. *Read*.—Nature of subject matter to be read discretionary (does not refer to night reading courses). *Read (-)*.—Reading assignment No. — as per department instructions (does not refer to night reading courses). *Aer. Nav.* (-).—Lesson assignment No. —, aerial navigation. *Combat* (-).—Lesson assignment No. —, combat and flight formations. *Exercise*.—Period assigned to exercise within academic limits other than gymnasium. *Gymna.*.—Period assigned for exercise in gymnasium; sixth period available for C. F. A. if not completed in fifth period. *C. F. A.*.—Complete forenoon assignment. *Boat Shed*.—March to and assemble at midshipmen's boat shed for general instructions preliminary to embarkation in seaplane for flight. *Secure*.—Return to rooms, Bancroft Hall, after dismissal. *Instr.* (-).—Oral instruction No. —, on subjects such as "Practical flying and water handling of seaplanes," "Safety precautions," "Rules of the road of the air," etc. Two lectures per week on general aviation and aeronautical subjects will be given.

Paschal, J. B.	Still, E. H.	Young, J. S. E., jr.
Patterson, R. E.	Stirling, Y., 3d.	Zemlicka, R.
Perrill, H. K.	Strain, C. L.	Zurmuehlen, G. D.
Pirie, R. B.	Strange, H. E.	

The following-named members of the class of 1926 who were scheduled for aviation instruction during the summer of 1926 were sent on the practice cruise for the reasons noted opposite their respective names:

Perry, E. R., disciplinary action.

Voit, E. F., scholastic deficiency.

Zirkle, E. B., disciplinary action.

# COURSE OF INSTRUCTION, 1926-27

[Reference books are marked \*]

## FIRST YEAR—FOURTH CLASS

### FIRST TERM

Departments	Periods each week	Subjects	Textbooks
ENGINEERING AND AERONAUTICS.	2	Descriptive geometry and mechanical drawing.	Bartlett and Johnson's Engineering Descriptive Geometry and Drawing.
MATHEMATICS.....	6	Solid geometry..... Plane trigonometry and logarithms. Mathematical analysis..	Hawkes—Luby—Touton. Bullard and Kiernan's Plane and Spherical Trigonometry. Griffin's Introduction to Mathematical Analysis. American Practical Navigator,* Bowditch.
ENGLISH.....	3	Composition and literature.	Smith's What Can Literature Do for Me? Stevens and Alden's Composition for Naval Officers. Alden and Earle's Makers of Naval Traditions. Westcott, Lewis, and Weber's Four Centuries of Literature. Webster's Collegiate Dictionary.* Spanish Pronunciation (Preliminary). Hills and Ford's First Spanish Course. Appleton's New Spanish Dictionary.*
MODERN LANGUAGES..... (One half of the class studies Spanish and the other half French.)	3	Spanish.....	French Pronunciation (Preliminary). The New Fraser and Squair French Grammar. Uniform International Dictionary, Hinds, Hayden, and Eldredge.*
	3	French.....	McPherson and Henderson's Elementary Study of Chemistry. McPherson and Henderson's Exercises in Chemistry. Pamphlet: Dashiell's Problems in Chemistry.
ELECTRICAL ENGINEERING AND PHYSICS.	2	Chemistry.....	

### SECOND TERM

ENGINEERING AND AERONAUTICS.	2	Descriptive geometry and mechanical drawing.	Bartlett and Johnson's Engineering Descriptive Geometry and Drawing.
MATHEMATICS.....	6	Mathematical analysis..	Griffin's Introduction to Mathematical Analysis. Mechanical Engineers' Handbook, by Marks.* American Practical Navigator,* Bowditch.
		College algebra.....	Rietz and Crathorne's College Algebra.
		Plane analytic geometry.. (All three taken concurrently.)	Palmer and Krathwohl's Analytic Geometry.
ENGLISH.....	3	Composition and literature.	Stevens and Alden's Composition for Naval Officers. Westcott, Lewis, and Weber's Four Centuries of Literature. Shakespeare's Henry IV: Part I, Othello, and King Lear. Hills and Ford's First Spanish Course. Crawford's Temas Españoles.
MODERN LANGUAGES..... (One half of the class studies Spanish and the other half French.)	3	Spanish.....	The New Fraser and Squair French Grammar. Méras' Le Second Livre.
	3	French.....	McPherson and Henderson's Elementary Study of Chemistry. McPherson and Henderson's Exercises in Chemistry. Pamphlet: Dashiell's Problems in Chemistry.
ELECTRICAL ENGINEERING AND PHYSICS.	2	Chemistry.....	

## SECOND YEAR—THIRD CLASS

## FIRST TERM

Departments	Periods each week	Subjects	Textbooks
ENGINEERING AND AERONAUTICS.	3	Engineering drawing....	Bartlett and Johnson's Engineering Descriptive Geometry and Drawing.
MATHEMATICS.....	5	Calculus.....	Townsend and Goodenough's Essentials of Calculus.
		Solid analytical geometry. (Taken concurrently with calculus.)	Palmer and Krathwohl's Analytic Geometry.
ELECTRICAL ENGINEERING AND PHYSICS. <sup>1</sup>	4	Physics.....	Mechanical Engineers' Handbook by Marks.* Spinney's Textbook of Physics. Department pamphlet on Gyro, Theory of Flight, Thermodynamics, etc. Department's Physics Laboratory Manual.
ENGLISH.....	3	Naval history.....	Stevens and Westcott's History of Sea Power. Clark, Stevens, Alden, and Krafft's Short History of the United States Navy.
MODERN LANGUAGES..... (One half of the class studies Spanish and the other half French.)	2	Spanish.....	Hills and Ford's First Spanish Course. Fernández and Purdie's Trozos Selectos.
	2	French.....	Méras' Le Second Livre. Fournon and Broussard's Pour Parler Français. The New Fraser and Squair French Grammar.

## SECOND TERM

ENGINEERING AND AERONAUTICS.	3	Mechanisms.....	Baker and Farrell's Principals of the Basic Mechanisms.
		Engineering materials and processes.	Ashe and Hale.
MATHEMATICS.....	5	Mechanics.....	Elementary Mechanics—Department of Mathematics, U. S. Naval Academy. Mechanical Engineers' Handbook by Marks.* Breckenridge's Polyphase Slide Rule Manual.*
ELECTRICAL ENGINEERING AND PHYSICS.	4	Physics.....	Spinney's Textbook of Physics. Department pamphlet on Gyro, Theory of Flight, Thermodynamics, etc. Department's Physics Laboratory Manual.
ENGLISH.....	3	Political and social history of the United States.	Wescott, Lewis, and Weber's Four Centuries of Literature. Schlesinger's Political and Social History of the United States. Atlantic Monthly (February to May).
MODERN LANGUAGES..... (One half of the class studies Spanish and the other half French.)	2	Spanish.....	Fernández and Purdie's Trozos Selectos. Hills and Ford's First Spanish Course.
	2	French.....	Fournon and Broussard's Pour Parler Français. The New Fraser and Squair French Grammar.

<sup>1</sup> Third class has 8 drill periods in December and January, and a like number in February and March devoted to recitation.

## COURSE OF INSTRUCTION

## THIRD YEAR—SECOND CLASS

## FIRST TERM

Departments	Periods each week	Subjects	Textbooks
ENGINEERING AND AERONAUTICS.	4	Boilers.....	Lyon and Hinds' Marine and Naval Boilers. Bureau of Engineering Manual.*
MATHEMATICS.....	5	Reciprocating engines and auxiliary machinery. Spherical trigonometry and stereographic projections. Differential equations... Engineering mathematics.	Barton and Stickney's Naval Reciprocating Engines and Auxiliary Machinery. Bullard and Kiernan's Plane and Spherical Trigonometry. Phillips. Department of Mathematics, U. S. Naval Academy.
ELECTRICAL ENGINEERING AND PHYSICS.	4	Magnetism and electricity (DC).	Timbie's Elements of Electricity. Bullard's Naval Electrician's Text Book, Vols. I and II. Department's D. C. Laboratory Manual.
NAVIGATION.....	3	Navigation.....	Navigation (Dutton). Useful Tables. Nautical Almanac.* Azimuth Tables.*

## SECOND TERM

SEAMANSHIP AND FLIGHT TACTICS.	3	Seamanship.....	Knight's Seamanship. Boat Book, 1920. Cyclonic Storms. Handling Ships, Notes B. Nautical Phraseology. Signal Books, U. S. Navy.
		Signals and communication procedure. Regulations..... Leadership ?.....	U. S. Navy Regulations. Naval Leadership. Blue Jacket's Manual.
		Naval aviation..... Aviation history.....	Naval Aviation, Warlick. Vol. I, U. S. Navy Aviation Ground School Manual.
ORDNANCE AND GUNNERY.....	3	Aerology..... Ordnance, gun construction, torpedoes and mines.	Do. Naval Ordnance, 1925. Notes on Torpedoes, Mines, Fire Control, and Battle Efficiency, Part 2. U. S. Navy Pensacola Ground School Manual, Vol. II.
NAVIGATION.....	4	Navigation.....	Navigation (Dutton). Useful Tables. American Practical Navigator. Nautical Almanac. Azimuth Tables.
ENGINEERING AND AERONAUTICS.	3	Reciprocating engines and auxiliary machinery. Naval construction.....	Barton and Stickney's Naval Reciprocating Engines and Auxiliary Machinery. Manning and Schumachers' Naval Architecture and Warship Construction.
		Theory of flight.....	U. S. Navy Aviation Ground School Manual, Vol. 3. Do.
ELECTRICAL ENGINEERING AND PHYSICS.	3	Structure and rigging... Electricity (D. C. and A. C.). Dynamo electric machines, primary and secondary batteries, searchlights, telephones, etc.	Bullard's Naval Electrician's Text-books, Vols. I and II. Timbie's Elements of Electricity. Department's D. C. Laboratory Manual. Department's A. C. Laboratory Manual.

\* Second class has in addition 8 periods in December and January during first term in drill periods Saturdays and a like number in February and March during second term.

## FOURTH YEAR—FIRST CLASS

## FIRST TERM

Departments	Periods each week	Subjects	Textbooks
SEAMANSHIP AND FLIGHT TACTICS.	3	Seamanship..... Signals..... Military law..... International law..... Communications (including aircraft communications and procedure).	Knight's Seamanship. Boat Book, 1920. Nautical Phraseology. Signal Books, U. S. Navy. Naval Courts and Boards. International Law, Soule and McCauley. Notes on Naval Communications. Bureau of Navigation Study Courses, Seaman Signalman 3c and Radioman 3c.
ORDNANCE AND GUNNERY.....	3	Ordnance and ballistics.	Naval Ordnance, 1925. Exterior Ballistics, 1926. Range and Ballistic Tables, 1926.
NAVIGATION.....	3	Navigation.....	Navigation (Dutton). American Practical Navigator. Nautical Almanac.* Azimuth Tables.*
ENGINEERING AND AERONAUTICS.	3	Thermodynamics..... Turbines.....	Ennis' Thermodynamics Abridged. Cox and Libbey's Naval Turbines.
ELECTRICAL ENGINEERING AND PHYSICS.	2	Alternating currents and alternating current machinery. Radio.....	Bullard's Naval Electrician's Text-book, Vol. I. Department's A. C. Laboratory Manual. Department Radio Manual. Department's Radio Laboratory Manual.
ENGLISH.....		After-dinner speaking (Tuesday and Thursday evenings).	
MODERN LANGUAGES. (One half of the class studies Spanish, the other half French.)	2	Spanish.....	Zaraqueta. Gil Blas.
HYGIENE.....	2	French..... Effects of alcohol and narcotics. Naval and military hygiene. First aid to the injured (14 Friday evening periods).	Labiche La Poudre aux yeux. Gil Blas. Heiner's physiology, First Aid and Naval Hygiene.

## SECOND TERM

SEAMANSHIP AND FLIGHT TACTICS.	3	Elementary strategy and tactics. Aviation History..... Aerology..... Leadership..... Regulations.....	Seamanship and War College pamphlets. Volume I, U. S. Navy Aviation Ground School Manual. Do. Naval Leadership. U. S. Navy Regulations.
ORDNANCE AND GUNNERY.....	3	Ballistics, fire control, gunnery.	Exterior Ballistics, 1926. Range and Ballistic Tables, 1926. Gunnery Instructions, U. S. N. Notes on Fire Control Part I and Part II. Bureau of Ordnance pamphlets. Official Publications.
ENGINEERING AND AERONAUTICS.	3	Turbines..... Internal-combustion engines.	Cox and Libbey's Naval Turbines. Lind's Internal-Combustion Engines. U. S. Navy Aviation Ground School Manual, Vol. I.
ELECTRICAL ENGINEERING AND PHYSICS.	3	Alternating currents and alternating current machinery. Radio.....	Bullard's Naval Electrician's Text-books, Vols. I and II. Department's A. C. Laboratory Manual. Department Radio Manual. Department's Radio Laboratory Manual.
ENGLISH.....	2	Modern European history (with lectures). After-dinner speaking (Tuesday and Thursday evenings).	Turner's Europe since 1789.
MODERN LANGUAGES. (One half of the class studies Spanish, the other half French.)	2	Spanish.....	Gil Blas. Spanish Nautical Phrase Book and Reader.
	2	French.....	Gil Blas. French Nautical Phrase Book and Reader.

		4, 2...	do				

<sup>1</sup> When first class has examination in E. E. & P. third period, Tuesday, seamanship recites first period.

<sup>2</sup> When first class has examination in languages second period, Thursday, all battalions, first class, recite E. & A. first period, Thursday.

<sup>3</sup> When first class has practical work or examination first period, Friday, seamanship recites third period.

<sup>4</sup> December and January.

First class lectures in hygiene fifth period, Fridays.

During the odd-numbered academic months, the first and fourth battalions recite the first hour of a period. During the even-numbered academic months, the second and third battalions recite the first hour of a period.

For the academic year of 1926-27 each odd-numbered battalion of the regiment studies Spanish, and each even-numbered battalion studies French. Assignment to each language on entrance becomes permanent for the entire course.

## ARRANGEMENT OF COURSES

### 1926-27

---

All courses are completed each term

Midshipmen are required to have a 2.5 or over  
in each department for each term

# RÉSUMÉ OF COURSE OF INSTRUCTION

## EXECUTIVE

The executive department, under the direction of the commandant of midshipmen, supervises the following:

Development of officerlike character and qualities in midshipmen.

Enforcement of the regulations for interior discipline.

Service of the regiment by its auxiliary departments, including the commissary, midshipmen's store, tailor shop, cobbler shop, barber shop, and laundry.

Administration of Bancroft Hall, where the regiment is quartered.

Accomplishment of executive drills, namely, infantry, setting-up, and bayonet exercises.

All midshipmen entertainments and activities other than academic work.

The Naval Academy band, the police force, and fire organizations.

Operation and upkeep of Naval Academy farm and dairy.

It is the endeavor of this department to instill into the regiment of midshipmen the highest standard of honor, loyalty, and patriotism. This is accomplished in the development of mental and physical cleanliness, the proper sense of duty and responsibility, and ability to command men.

### *Summary of practical instruction periods, 1926-27*

[Numbers preceding dash indicate number of week days; numbers following dash indicate number of Saturdays]

NOTE.—In accord with action of the Academic Board the second class will have recitations in seamanship and the third class will have recitations in electrical engineering and physics during the second period on Saturdays during the academic months of December, January, February, and March.

### SEAMANSHIP AND FLIGHT TACTICS

The department of seamanship and flight tactics has for its mission the instruction of midshipmen to the end that upon graduation they may be capable of efficiently performing the duties of a junior officer afloat, as junior officer of the watch, junior deck division officer, junior forecandle officer, boat officer, assistant communication officer, and recorder of a summary court-martial. Midshipmen receive instruction giving them an elementary knowledge of flight tactics.

Seamanship drills commence with the day of the fourth classman's entrance into the academy, continue throughout the entire course, and are supplemented by practical instruction on the practice cruises. Commencing with learning how to pull a service cutter, the drills progress through handling service-type and civilian-type boats under oars, sail, and power; signals—semaphore, Morse visual code, and flag hoist; ground tackle work; knotting and splicing; compass, log, and lead; tactics and evolutions; communications.

In general, members of the fourth class take the ordinary crew duties, and have qualifications similar to seaman; third class, as important crew members, with qualifications as petty officer; second class, as second in command, with qualifications as chief petty officer; and first class, in command, with qualifications as junior officer.

Recitations are held in seamanship second term of third year, and throughout both terms of the fourth year. The instruction covers signals, seamanship in general, nautical phraseology, communications, regulations, military law, elementary strategy and tactics, international law, leadership, and aviation subjects connected with flight tactics, such as "Aviation History," "Aerology," "Aircraft Communications," and "Aviation Scouting."

For the first class, additional instruction in tactics and in seamanship evolutions is carried on in submarine chasers, all of the duties of the deck force being taken over by the midshipmen, under the supervision of experienced officer instructors.

### ORDNANCE AND GUNNERY

The course includes all the theoretical and practical instruction required for the performance of gunnery duties aboard ship as a junior officer and in addition gives a thorough basic foundation for future study and development work in ordnance and gunnery. It is divided into two parts, section room and practical instruction. The section room instruction covers subjects which must be studied and can best be learned as a midshipman; the practical instruction and drill includes work with all types of naval ordnance from small arms to turret guns and methods for control of all weapons. Drills which can be best given aboard ship and preparations for target practice are held during the practice cruise and not at the Naval Academy.

The practical work begins the summer of the fourth class year and includes firing on the rifle range with rifle and pistol up to the experts' course, drill with broadside guns, and explanation of all ordnance equipment and models in Dahlgren Hall. During the fourth, third, and second class years this practical instruction is continued with small arms, machine guns, broadside battery, models and training in the duties of all personnel connected with ordnance. Second class also has instruction in torpedoes and fire control. First class year is devoted to fire control and methods of using broadside and turret guns, torpedoes, aviation ordnance, aviation bombing, grenades, and gas masks. On the first class practice cruise midshipmen, first class, perform the duties of officers in gunnery exercises with the fleet.

Instruction in the section room begins the second term, second class year, with a study of naval ordnance, gun construction, and torpedoes. In first class year a study is made of gun construction, powder pressures, velocities and trajectories of projectiles, ranges and errors of naval guns, fire control of all types of guns, gunnery methods, including aviation gunnery, and the duties of a junior officer in the gunnery department aboard ship.

Textbooks and service publications are used which have been specially written by experienced officers of the United States Navy for instructional purposes of midshipmen and junior officers. Besides the study of these, a series of lectures on practical ordnance and gunnery is given by officers from the Navy Department or the fleet.

Throughout the course great stress is laid not only upon the duties of a junior officer in gunnery, but the relation of each subject to the development of ordnance and gunnery in the United States Navy, the present gunnery methods of the fleet, and the possible future requirements which must be met by naval officers who are graduates of the Naval Academy.

#### SECOND CLASS CRUISE

*Object.*—Preliminary instruction under practical working conditions.

The subject is first presented to the midshipmen by a limited amount of instruction in dead reckoning and the compass at a time when he can readily see the practical application of these subjects in directing and checking the movements of the ship from port to port.

#### SECOND CLASS YEAR—FIRST TERM

*Object.*—Basic instruction in the elements of geo and celo navigation.

This term is devoted to the basic preparation for finding the position of the ship either along the coast or in the open sea. The instruction and the practical work, both in computation and on the chart, is correlated so that the midshipman learns gradually the proper relation between the geographical position and the mathematical solution. The instruction in astronomy due to the limited time available is curtailed so that only enough of this subject is given to enable the student to have a clear conception of the present theories of the solar system and the universe and their bearing on the determination of position. The mathematical determination of position is completely developed in cooperation with the department of mathematics, where at the same time the solution of the astronomical triangle by spherical trigonometry and the use and value of stereographic projections are being taught.

Practical instruction is also given in the proper use and compensation of the magnetic compass.

Practical instruction in piloting is commenced and continued throughout the term.

## SECOND CLASS YEAR—SECOND TERM

*Object.*—To consolidate the work of the first term so as to give the midshipman a logical and comprehensive idea of the navigator's daily work in conducting the ship from place to place and checking her position.

The result desired is to so prepare the midshipman that he will be able to get the most practical value out of his first class cruise where he will have an opportunity to take observations and actually locate the ship on the chart.

The practical instruction in chart and compass work is continued with the idea of making the midshipman thoroughly familiar with the proper methods of piloting.

The drills are designed to give a thorough working knowledge of the care, operation, and handling of the sextant.

## FIRST CLASS CRUISE

*Object.*—The practical application on board ship of the instruction given during second class year.

The midshipman is required to take sights, work them out and locate the ship, both by means of these sights and by dead reckoning. Piloting is taught under circumstances which enable the midshipman to see clearly how the ship is handled. The actual compensation of a ship's compass is carried out when possible and the midshipman required to assist so that the practical difficulties encountered may be clearly seen and appreciated. The use of the gyro compass is demonstrated and instruction given in its use.

## FIRST CLASS YEAR—FIRST TERM

*Object.*—To perfect the midshipman's knowledge of the subject so that he will be capable on graduation of taking up the duties of the navigator on a small ship and will lack only the very necessary practical experience to make him a master of this branch of the naval profession.

A fictitious circumnavigating world cruise is conducted to give the midshipman all possible variations of the problem of position. In addition the following subjects are covered by instruction in the section room and by practical chart problems.

- (a) The duties of the navigator in accordance with Navy regulations.
- (b) Aerial navigation.
- (c) The value and use of radio bearings.
- (d) The use and relative value of other methods for the solution of the astronomical triangle.
- (e) Hydrographic surveying.

The drills during this year cover the following:

- (a) Hydrographic surveying.
  - (1) Boat work.
  - (2) The use of instruments on shore.
  - (3) Measuring a base line.
  - (4) Chart construction.
- (b) The use of the Battenberg course indicator, the drafting machine, the stadimeter, and other similar instruments.
- (c) The books, charts, and other publications of the Hydrographic Office and the Department of Commerce used by the navigator. Where to find them and how to use them.

## ENGINEERING AND AERONAUTICS

## FOURTH CLASS YEAR—FIRST TERM

*Descriptive geometry and mechanical drawing.*—Instruction in use of drawing instruments and development of manual dexterity in employment. Standard methods of lettering and practice in their use. Application of the foregoing to descriptive geometry, with the representation of lines, planes, curved surfaces and intersections, in order to develop the ability to visualize objects in space.

## FOURTH CLASS YEAR—SECOND TERM. THIRD CLASS YEAR—FIRST TERM

*Engineering drawing.*—Making of free-hand working sketches of small machine parts, with full dimensional data taken from work, and the making of standard working drawings from such sketches. The making of detailed from assembled drawings, and vice versa, particular emphasis being laid upon the ability to correctly read blue prints.

## THIRD CLASS YEAR—SECOND TERM

*Mechanisms.*—A study of the underlying principles governing the relative motions of parts of machinery, including revolving and oscillating bodies; belt, rope, and chains; motion by pure rolling contact; gears and gear teeth; wheels in train; inclined plane, wedge screw, worm, and wheel; cams; relative velocities of rigidly connected points; linkwork; straight-line mechanisms; parallel motions; aggregate combinations; pulley blocks; intermittent motion.

*Engineering materials and processes.*—A study of engineering and construction materials; their properties and uses, and the essential steps in producing them from ore to the finished product. Methods of shaping metals for use and a study of the essential features of metallography, particularly with reference to steel.

## SECOND CLASS YEAR—FIRST TERM

*Boilers.*—A study of marine boilers, including a detailed study of the more important types, with methods of manufacture and materials used; general methods of repair; fuels, both oil and coal, and proper method of burning for greater economy; boiler auxiliaries and details of construction; tests and how conducted; operation, care, preservation, and overhaul.

## SECOND CLASS YEAR—FIRST AND SECOND TERMS

*Naval reciprocating engines and auxiliary machinery.*—General principles and thermodynamics as applied to this type of engine; detailed study of mechanical parts and materials used; measurement of power; construction and operation of condensers, pumps, valves, heaters, tanks, etc.; lubrication, operation, care, and overhaul of complete installations.

## SECOND CLASS YEAR—SECOND TERM

*Naval construction.*—General study of ship's lines and definitions pertaining thereto; various steps in planning a ship; calculations of areas and volumes; general principles of stability, both static and dynamic; displacement and trim, with curves in relation thereto; effects of weight distribution and of weight shifting; resistance of ships; coefficients of speed; law of corresponding speeds; ship nomenclature; details of construction of naval vessels; launching and docking; general arrangement of ship compartments and methods of flooding, draining, and ventilating; details of steering gear; care and preservation of hulls.

*Theory of flight.*—A further study of the subject covered by the United States Navy Aviation Ground School Manual.

*Aircraft structure and rigging.*—A study of nomenclature, materials used in construction, overhaul, and assembly of heavier-than-air craft.

#### FIRST CLASS YEAR—FIRST TERM

*Thermodynamics.*—The utilization of heat as energy to perform mechanical work in various types of machinery such as turbines, internal-combustion engines, refrigerating machinery, etc., including a study of the use of steam tables and diagrams.

#### FIRST CLASS YEAR—FIRST AND SECOND TERMS

*Steam turbines.*—Underlying principles of turbines, their classification into types, and the characteristics of each type. Necessary turbine auxiliaries. Detailed study of various makes of turbines used in the Navy. Operation and care of marine turbine installations.

#### FIRST CLASS YEAR—SECOND TERM

*Internal-combustion engines.*—Underlying principles of internal-combustion engines. Study of Otto and Diesel cycles, and their application to existing types of engines. Fuels and lubricants. Detailed study of marine types of gasoline and oil engines, and of aircraft engines, including mechanical parts, carburetion, lubrication, cooling and ignition systems. Most common faults and remedies.

#### PRACTICAL WORK

#### FOURTH CLASS YEAR—SUMMER

*Pattern shop.*—Elementary work of the carpenter shop, mortising, joining, woodworking lathes, etc.

*Machine shop.*—Chipping and filing of conventional pieces of iron and brass.

*Sketching.*—Sketching and dimensioning of simple geometrical shapes.

*Copper shop, forge shop, foundry.*—Elementary instruction in work done in these shops.

*Miscellaneous.*—Examination of and lectures on boilers, reciprocating engines, turbines, internal-combustion engines, fireroom and engine-room auxiliaries, evaporators, etc.; ship construction, docking, steering engines, anchor engines, etc.

#### FOURTH CLASS YEAR—WINTER DRILLS

*Pattern shop.*—Selection and treatment of different kinds of woods for various purposes; continuation of summer work of the carpenter shop to finished pattern work.

*Machine shop.*—Vise bench work, principally fitting of bearings.

*Miscellaneous.*—Continuation of summer exercises.

#### THIRD CLASS YEAR—PRACTICE CRUISE

Tour of inspection of engine and boiler compartments and auxiliary stations; a study and sketching (where applicable) of the general arrangement of machinery, accessories and fittings, corrosion, cleaning and painting, care of compartments, blue-print reading. Stand watches of firemen.

#### THIRD CLASS YEAR—WINTER DRILLS

*Foundry.*—Kinds of sand and implements used; making of molds; melting and pouring of iron and brass.

*Forge shop.*—Equipment and tools used; forging, welding, tempering, case-hardening, etc.; bending and quenching tests of metals, etc.

*Boiler shop.*—Riveting, soft and hard patching, calking, annealing, cutting out tubes, expanding tubes, etc.

*Coppersmith shop.*—Soldering, hard and soft; making copper pipe; putting flanges on pipe; use of oil furnace and oil heater; sweating patch on a copper pipe.

*Machine shop.*—Machine-tool work from working drawings, including the setting of work; machine tools used are lathes, planers, vertical and horizontal boring mills, simple and radial drill pressers, shapers, milling machines, slotters, etc.

*Fuel-oil-burning boiler.*—Lighting fires and raising steam from a cold boiler; handling boiler under forced draft; control of fires for smokeless or smoke conditions; study of various types of burners; safety precautions to be observed in the handling and burning of fuel oil.

*Miscellaneous.*—Use of various measuring instruments; gauge calibration; acetylene cutting and welding; electric welding; thermit welding; strength of metals; sketching of engineering parts.

#### SECOND CLASS YEAR—PRACTICE CRUISE

Indicator cards; lubrication system; boilers and fittings; piping; auxiliaries and accessories; ship, boat and airplane structure. Stand watches of petty officers.

#### SECOND CLASS YEAR—WINTER DRILLS

Lining up, bearing adjustment, and valve setting of engines; operation and overhauling of evaporator plant, refrigerating plant, air compressors, traps, steering and anchor engines; detailed inspection of pumps, condensers, and distillers; propeller measurements; operation of steam reciprocating engines; and determination by indicator of horsepower developed; coal testing; flue-gas analysis; boiler inspections and tests; water testing; fuel-oil testing; pump testing. Inspection of various ship models showing details of warship construction; also docking, inclining experiments, damage stability control, aircraft structure and rigging.

#### FIRST CLASS YEAR—PRACTICE CRUISE

Administration of the engineer department; study and operation of main engines, power boat and aircraft engines; emergencies; repairs; stand watches of junior officer, machinist, and chief petty officer.

#### FIRST CLASS YEAR—WINTER DRILLS

Operation of steam turbines and internal-combustion engines; determination, by dynamometer, of horsepower developed; torsion meter; detailed inspection of marine turbines, reduction gear, and condensing plant; detailed inspection of carburetors and magnetos and the adjustment of them; detailed inspection and operation of various types of marine and aircraft gas engines; visits to experiment station; log-room administration; pump calibration.

### MATHEMATICS

#### FIRST YEAR—FIRST TERM

*Solid geometry.*—The geometry of lines and planes in space, polyhedrons, cylinders, cones, spheres; development and use of formulas for surfaces and volumes; demonstrations of propositions; solution of problems by construction and computation.

*Logarithms.*—Definitions and properties; practical use in computation; tables of logarithms of numbers, of logarithms of trigonometric functions, and tables of natural functions; haversine tables; special system of forms for computation.

*Plane trigonometry.*—Measurement of arcs and angles; trigonometric functions; development and use of fundamental trigonometric relations and identities; solution of trigonometric equations; solution of all cases of plane triangles, including development of formulas and methods for same; simple applications to measuring heights and distances.

*Mathematical analysis.*—Functions and graphs; instantaneous rates, tangents, areas, etc., as *limits*; differentiation; integration.

#### FIRST YEAR—SECOND TERM

*Mathematical analysis.*—The remainder of this text is completed during the second term and is taken concurrently with college algebra and plane analytic geometry—parts of each of these two subjects being taken up when needed by the treatment of the analysis. The remainder of the analysis covers—trigonometric functions; logarithmic and exponential functions; rectangular coordinates; solutions of equations; polar coordinates; trigonometric analysis; definite integrals; progressions and series; permutations, combinations, and probability; complex number system.

*Algebra.*—Short review of important parts of elementary algebra; quadratics and advanced algebra, including inequalities, mathematical induction, binomial theorem, variation, progressions, complex numbers, theory of equations, partial fractions, permutations, combinations, probability, determinants.

*Plane analytic geometry.*—Cartesian and polar coordinates; equations of straight lines and of the conic sections; equations of given loci; loci of given equations, analysis and plotting; parametric equations; transcendental curves; general equation of second degree, discussion and simplification.

#### SECOND YEAR—FIRST TERM

*Calculus.*—Constants, variables, and functions; derivatives of algebraic functions, applications of derivatives; differential notation; differentiation of transcendental functions; integrations; applications of integrations; successive differentiations and integrations; curves and curve tracing; definite integrals; application of integrations to geometry and mechanics; special methods of integrations; functions of two or more variables; multiple integrals; infinite series.

*Solid analytic geometry.*—Taken concurrently with calculus. Equations of the plane, of the straight line in space, and of special surfaces of the second order.

#### SECOND YEAR—SECOND TERM

*Mechanics.*—Theory and use of slide rule; vectors; statics of a particle; forces acting on a rigid body; statics of a rigid body; centers of gravity and moments of inertia; deformable bodies, beams; rectilinear motion; work and energy; curvilinear motion; dynamics of a rigid body; brief treatment of hydromechanics.

#### THIRD YEAR—FIRST TERM

*Spherical trigonometry and stereographic projections.*—Solution of all cases of spherical triangles, including development of formulæ; graphical solution of spherical triangles; great circle courses and distances, both graphical and numerical solutions; the astronomical triangle and its projection on various primitives; numerical solutions of astronomical triangle covering various cases—time sight, meridian altitude, etc.

*Differential equations.*—Thorough drill in the setting up and solution of geometrical and physical problems involving important types of ordinary differential equations.

*Engineering mathematics.*—Includes: Brief treatment of precision of measurement; least squares; complex numbers; empirical formulæ; accuracy of computa-

tion, etc. Also includes a general problem course covering actual engineering problems encountered in other departments, and so arranged as to create necessary association between the course in mathematics and the work in practice later on.

#### ELECTRICAL ENGINEERING AND PHYSICS

The courses of instruction undertaken by this department cover a wide scope and include chemistry, physics, direct-current electricity, alternating-current electricity, and radio. The time available for each of these subjects is comparatively short, and the courses are, therefore, more or less elementary, special emphasis being placed on fundamental principles. The following is an outline of the subjects studied by each class:

##### FOURTH CLASS—FIRST AND SECOND TERMS

The year is devoted to the study of chemistry, the ground covered being general inorganic chemistry, with laboratory work. In addition, lectures are given on the application of chemistry to devices and appliances in the service, water testing, gas analysis, explosives, chemical warfare, service paints, and qualitative analysis.

Practical work in the chemical laboratory supplements the classroom instruction. Experiments are performed illustrating the preparation and properties of various gases and other substances, and include elementary qualitative analysis.

While the shortness of the time allowed necessitates only an elementary treatment of most subjects, it is believed that the course is of sufficient scope for the needs of a naval officer.

##### THIRD CLASS—FIRST AND SECOND TERMS

The important subject of physics is taken up during the whole of the third class year and includes the study of mechanics, heat, sound, light, magnetism, and elementary electricity, and the application of the various laws and phenomena in these branches of the subject with special stress on problems. The course forms the ground work for more advanced studies in other subjects, and includes the flight of projectiles, balloons, gyroscopes, elements of thermodynamics, submarine listening devices, theory of flight, and optical instruments.

Practical work in the physics laboratory comprises experiments illustrating various physical laws and phenomena studied in the classroom. A number of lectures are also given during the year.

##### SECOND CLASS—FIRST AND SECOND TERMS

The whole of second class year, with exception of the last six weeks of the second term, is devoted to the study of magnetism, electrostatics, and direct-current electricity. During the first term, the fundamentals of simple electric circuits are studied with applications of Ohm's and Kirchoff's laws, while the second term is devoted principally to the theory and operation of dynamo electric machines and to the electrical installations found on board naval vessels. During the last six weeks of the second term elementary alternating current theory is taken up.

The laboratory work covers the following: Magnetic fields, induced currents, measurement of resistance, divided circuits, fall of potential, use and calibration of different measuring instruments supplied to ships, setting up and operation of primary and secondary batteries, operation of searchlights, arc and mercury vapor lamps, telephones and other electrical interior communication apparatus supplied to naval vessels, operation and measuring efficiencies of dynamos and motors, devices for motor-control, manipulation of switchboard, operation of

electrical machinery supplied to naval vessels, testing for and locating faults and grounds, measuring insulation resistance of electric plants, etc. There are also experiments toward the end of the year for studying the characteristics of inductance and capacity.

A series of lectures is also given during the term which are designed to elucidate difficult points, and as a review of the text already covered.

#### FIRST CLASS—FIRST AND SECOND TERMS

The first class takes up the subject of alternating-current electricity, including radio, about half of the time available being devoted to the study of radio. The course in alternating-current electricity is considered to be of great importance due to the application of alternating-current machinery on board ship, principally in connection with the electric drive. This course starts with the theory of alternating-current generators and simple alternating-current circuits, including problems on series, parallel, and series-parallel circuits, and advances into the study of synchronous motors, transformers, polyphase currents, and induction motors with the application of the latter to the electric drive.

The radio course covers the underlying principles of radio communication. The time allotted to radio is devoted to the study of the fundamental principles governing the operation of spark, arc, and vacuum tube equipment according to their relative importance.

The above radio course covers the following: Wave motion; resistance, inductance, capacity, and resonance, as applied to radio circuits; the simple oscillating circuit; use of the frequency meter; damped and continuous wave transmission; radiation of waves; receiving apparatus; uses of the vacuum tube as a detector, amplifier, modulator, and oscillator; regeneration; multiple stage amplification; radio telephony; antennas; interference and selectivity; and naval radio apparatus.

Laboratory work and lectures form an important part of the course. The electrical laboratory work comprises an elementary study of inductance and capacity in alternating-current circuit, alternating-current dynamos, motors, and transformers. In the radio laboratories the instruction comprises experiments with simple oscillating circuits, use of frequency meters, spark sets, arc sets, use of vacuum tube as a detector, amplifier, generator and modulator, aviation radio practice.

#### ENGLISH

This department includes in its field subjects commonly assigned to both English and history. The entering class, at the very beginning, have their attention directed to the importance of naval tradition; in the Naval Academy library and yard they are made to feel the significance of the great names of the service which many of them meet for the first time. During the academic year courses are given in composition and literature, naval history, political and social history of the United States, and modern European history.

In composition, emphasis is put upon (1) the paragraph as the constructive unit; (2) the letter, social and official, this being the kind of writing the midshipman will most frequently use; (3) the technical article, a kind of composition which later as a naval officer he will employ to set forth the results of his thought and investigation; and (4) after-dinner speaking, a form of oral composition which no officer can be inexperienced in without loss of dignity and usefulness. In literature, a survey is made of the entire field from the latter part of the sixteenth century to the present day, especial emphasis being given to Shakespeare and to the modern essay.

In naval history attention is directed to sea power and its relation to (1) development of ships and armament; (2) lives and characters of great leaders (particular stress being placed on the growth of American naval tradition);

and (3) effect on contemporary and subsequent history. A critical study is made of the great naval engagements from Salamis to Jutland. In the political and social history of the United States the period covered is from 1829 to the present time. The textbook on this subject is supplemented by readings in American literature selected to bring out the development of American thought and culture and also to suggest recent achievements in the field of letters. In modern European history the course is based on a comprehensive textbook, supplemented by lectures by historians of national reputation and also by men of affairs who are authorities on the countries studied. The aim is not only to vitalize the study of history but to give the midshipman such a knowledge of international problems as will fit him to be an intelligent representative of America in every country he may visit.

At the beginning of each course in English or history the effort is made to secure the interest and cooperation of the midshipman by making clear to him just how and why the proposed course will be of practical benefit to him in his career as a naval officer.

### MODERN LANGUAGES

1. The mission of the department of modern languages is to give to midshipmen a sufficient knowledge of French or Spanish to help or enable them to converse in the foreign tongue, to express themselves clearly in written communications, and to read with sufficient ease French or Spanish of average difficulty. Throughout the course emphasis is laid on the knowledge of fundamental elementary principles to the end that, however late in his career he may be called upon to utilize his knowledge, the officer will have a solid foundation on which to build.

2. On admission to the Naval Academy approximately one half of the midshipmen are assigned to study French while the other half are assigned to study Spanish. This assignment depends on the preference of the individual midshipman and is permanent for the entire course.

3. The textbooks in use are modern and practical. Since the number of midshipmen in a section does not exceed 15, special attention is given to the individual.

4. The course in modern languages covers three academic years and consists of approximately 200 recitations.

### HYGIENE

Soon after entrance midshipmen of the fourth class are given a course in personal hygiene and the care of the human machine. This includes a series of lectures to the class as a whole and instructions of a more detailed character over a period of several months to small groups of the class. The purpose of this course is to prepare the members of the entering class to make their fullest personal contribution to the continuance of their health (individually and collectively) and thus to their best scholastic possibilities. In other words, it is to ground them in the art of keeping themselves in good health—to acquaint them with those precautions which every man can take in his own behalf to prevent disease or minimize its effects and thus maintain himself at all times in the best possible physical condition and mentally alert. The course comprises the following subjects:

- (a) Physical education; i, e., care of the human machine.
- (b) Personal hygiene, including social hygiene education.
- (c) Physical training, the benefits of muscular activity, and the dangers of overtraining.
- (d) Preventable diseases and simple rules for maintaining health.
- (e) Oral prophylaxis and the care of the teeth.

A competent representative of the medical department is always present at all official contests and authorized sports. For graduation a midshipman is required to show, by standard strength and gymnasium tests, that he is 100 per cent physically efficient.

The first class during the second term is given a course in general hygiene, physiology, and first aid, using the adopted textbook by Commander R. G. Heiner, Medical Corps, United States Navy. An outline of the course is as follows:

- I. Minute anatomy and cell physiology.
- II. Gross anatomy and physiology.
- III. Bacteriology.
- IV. Preventable diseases.
- V. Venereal diseases.
- VI. Naval hygiene.
- VII. Military hygiene.
- VIII. Physical training.
- IX. First aid, including that for the effects of gas warfare.
- X. Alcohol and other narcotics; their effects and dangers.

The course is illustrated by charts, manikin, skeleton, blackboard drawings, and moving-picture reels and includes a special lecture on the relation of the oral cavity to the general nutrition and health of the body.

Emphasis is placed on the methods of giving first aid, and practical demonstrations are given in order to prepare these future officers for the instruction of the men of their divisions, as required by Navy Regulations.

At the end of this course of 14 periods an examination is held covering all of the subjects contained in the textbook above mentioned.

#### PHYSICAL TRAINING

In this department midshipmen are trained in the principles of health and recreation so as to have before them a long period of healthful service in life. In addition, they are given instruction in the various branches of physical drill and athletics so as to be better qualified to lead and coach fleet athletics.

#### FIRST YEAR—FOURTH CLASS

*Initial examination.*—Immediately upon entrance to the Naval Academy each midshipman is tested for defects in strength, posture, and swimming. A photographic and graphic record is made at this time.

#### *Requirements*

*Swimming.*—Ability to swim five minutes using three strokes.

*Strength.*—Ability to equal the standard for strength in 32 out of 42 of the chief muscles of the body.

*Gymnasium requirements.*—Practical use of muscles in various combinations such as jumping, running, etc.

*Posture.*—Knowledge of proper "brace" and ability to assume a correct posture.

*Boxing.*—Demonstration of the elements of self-defense.

*Wrestling.*—Knowledge and use of six wrestling holds and their counters.

*Dancing.*—Ability to demonstrate fundamentals of dancing.

In addition to the above subjects which are required, midshipmen of the fourth class are given instruction in football, baseball, crew, track and field, basketball, swimming, boxing, wrestling, lacrosse, rifle, fencing, gymnastics, water polo, tennis, soccer, handball, and training.

## SECOND YEAR—THIRD CLASS

*Requirements*

*Swimming.*—Ability to swim 120 yards in three and one-half minutes, using three strokes.

*Strength.*—Ability to equal the standard of strength in 36 out of 42 of the chief muscles of the body.

*Gymnasium requirements.*—Graded improvement in use of muscles to equal the standards set in 14 practical gymnasium tests.

*Posture.*—Knowledge of proper “brace” and an habitual correct posture while standing or marching.

In addition to the above requirements midshipmen of the third class are given instruction in the rules and fundamentals of the sports listed under fourth class.

## . THIRD YEAR—SECOND CLASS

*Swimming.*—Ability to swim 160 yards in four minutes and thirty seconds, using four strokes. Practical demonstration of life saving and knowledge of resuscitation.

*Strength.*—Ability to equal the standard for strength in 42 of the chief muscles of the body.

*Gymnasium requirements.*—Ability to equal the “A” tests in 14 various uses of the body in gymnasium tests.

*Posture.*—Ability to demonstrate proper posture and direct others in the fundamentals of posture.

In addition to the above requirements midshipmen of the second class are instructed in the methods of officiating athletic contests in the various branches of sports.

## FOURTH YEAR—FIRST CLASS

Instruction in self-defense in use of the cane, rough and tumble, boxing, and wrestling. Course in coaching athletics, selective for sports desired.

Text book used, Manual of Athletic Requirements, United States Naval Academy.

Additional instruction given by moving-pictures and selected slides.

## ATHLETICS

In the branch of athletics which is entirely voluntary the department of physical training, in conjunction with the Navy Athletic Association, trains and fully equips all athletic teams, whether of Navy, class, or company degree.

A complete organization with necessary equipment is provided so that a midshipman of any size, weight or degree of skill may find suitable opportunity for participation during all recreation periods.

In general, all outside athletic competition is restricted to colleges and preparatory schools. A wide range of competitive sports ranging from 'Varsity, freshman and class competition to company meets, induces practically every midshipman to participate in one or more branches at some time during his course at the Naval Academy.

## LIBRARY

The library contains 64,000 volumes, and increases at the rate of about 1,500 volumes a year. It is commodiously housed in Mahan Hall, in three large rooms, which are well lighted and ventilated, and all on the same level, with one of them containing a second deck for the shelving of bound sets of periodicals. The collection is especially rich in naval literature; and it is strong in history, biography, literature, travel, and reference books, with other subjects developed in less degree. About 75 periodicals are taken, one newspaper, and upward of 20 serials or annuals. All of this material is on open shelves, as freely accessible as it would be in one's own home. The arrangement is plain and convenient. The hours on week days are from 9 a. m. to 6:30 p. m., and on Sundays from 2:30 to 6:30 p. m. The allowance of books that may be borrowed is eight at a time to officers and professors, and two to midshipmen (periodicals counting as books). A bulletin board announces the new books, and shows the contents of the "Proceedings of the Naval Institute," a monthly magazine of uncommon merit and of great value to the service. Further, to show what the library has to offer and to promote its uses and service, a leaflet or mimeographed bulletin is issued about once a week, containing the titles of from 20 to 25 of the latest books acquired, and beneath each title is a line or two describing the characteristics of the work. Sometimes these bulletins are made up entirely of the titles of articles contained in the publications of naval or engineering societies, and at other times they show the latest articles of special professional interest that appear in the leading magazines. This bulletin is sent to all officers, professors, and midshipmen. It keeps them promptly informed of the books last acquired, and of those ready for use, and it is an aid to all concerned.

Use of the library has been growing steadily, both in reference and research work and in the number of books borrowed and carried to quarters. All midshipmen are required during their first summer to spend there one hour and a half a week. These periods are under the direction of the department of English, and professors of that department are present at such times. The purpose is to acquaint midshipmen with the books, and to teach them how to use the catalogue and to look up topics on which information is sought, when they have need to do so.

Midshipmen may go to the library at all times when their studies and duties do not prevent. The library, constructed on lines of broad culture, reflects this in the training of midshipmen, and aids in giving them that general development which is important in the aim of the Naval Academy.

## SUMMARY OF COURSE IN AVIATION INSTRUCTION

A course in aviation for the graduating class, supplementing the regular curriculum, was established at the Naval Academy by the Navy Department in May, 1925. The course includes three months of special intensive training instruction in the ground and flight work, the object being to send the graduating class away from the Naval Academy well founded in the fundamental requirements of naval aviation. The first class to receive this aviation instruction was the class graduating in 1926.

The scope of the course includes the following subjects and practical training, with time allotted to each in accordance with its relative importance:

- Structure and rigging.

- Aviation engines.

- Radio instruments.

- Aircraft communication.

- Aerology.

- Navigational instruments.

- Aerial navigation.

- Radio code practice.

- Flight training.

- Aerial gunnery.

- Aerial bombing.

- Range gunnery.

- Aircraft scouting.

- Combat and flight formations.

- General and special lectures on aviation subjects by prominent aviators.

- Reading courses on aviation subjects.

# PRIZES AWARDED DURING THE ACADEMIC YEAR 1925-26

## PRESENTED BY THE UNITED STATES NAVAL ACADEMY FOR GENERAL EXCELLENCE IN TARGET PRACTICE

Gold medal, small arms, Midshipman C. E. Coffin, jr., class of 1927; silver medal, small arms, Midshipman E. R. Van Sickle, class of 1927; bronze medal, small arms, Midshipman C. C. Pyne, class of 1927.

Midshipmen who qualified as expert riflemen:

### *First class (1926)*

Armstrong, R. G.	Crissman, G. G.	Sellers, A. M.
------------------	-----------------	----------------

### *Second class (1927)*

Alderman, R. B.	Dreyspring, J. G.	Knowles, K. A.
Coffin, C. E., jr.	Eckberg, H. F.	Newton, M. S.
Dahl, T. O.	Hickox, R.	Pyne, C. C.
Davis, E. E.	Hinners, R. A.	Van Sickle, E. R.
DeKay, C. G.	Hubbard, M. H.	

### *Third class (1928)*

Bole, J. A., jr.	Brett, J. H., jr.	Rittenhouse, B. N., jr.
	Mitchell, C. B.	

### *Fourth class (1929)*

Allen, W. C.	Hood, A. H.	Pennington, D. K.
Armstrong, W. D.	Jackson, R.	Prause, J. H.
Ashford, G. W.	Keatley, J. H.	Renwick, D. A.
Boyd, A. M.	Knight, J. B., jr.	Roberts, D. C.
Coleman, W. F.	Kuhlman, C. E.	Roberts, W. M.
Crist, R. F., jr.	Leavitt, R. B.	Rogers, C. B., 3d.
Curry, M. L.	Lewis, F. W., jr.	Saul, W. B.
Davison, T. W.	Loomis, A. E.	Stayer, E.
Deputy, N. O.	McCauley, C. C.	Stewart, C. W.
Duborg, F. R.	McLaughlin, R. E.	Stovall, W. S., jr.
Duval, J. B., jr.	Miller, C. F.	Sullivan, R. B., jr.
Eller, D. T.	Mills, J. H., jr.	Tolley, K.
Frankel, S. B.	Morgan, C. C.	Weakley, C. E.
Hill, A. S.	Murray, H. C.	White, W. W.
Hogle, R. D.	Parish, E. W., jr.	

### CLASS OF 1897 SWORD AND CUP

A sword is awarded annually by the class of 1897 to that midshipman who has contributed most by his officerlike qualities and positive character to the development of military spirit and loyalty within the regiment. The name of the midshipman to whom the sword is awarded is inscribed on the class of 1897 cup. The cup is retained at the Naval Academy. Midshipman James Andrew Greenwald, jr., class of 1926, was awarded the sword and his name was inscribed on the cup.

**CLASS OF 1871 SWORD**

The class of 1871 provides funds each year to be given to that midshipman of the graduating class who is most proficient in practical and theoretical ordnance and gunnery, with the understanding that the recipient will purchase a Navy dress sword with these funds. There are further requirements as to how the sword shall be engraved. Midshipman John Sylvester, class of 1926, was awarded this prize.

**CLASS OF 1924 PRIZE**

There has been established by the class of 1924 a fund which provides annually for the presentation of a gold watch to that midshipman of the graduating class who stands highest for the course in the department of engineering and aeronautics. Midshipman Albert Girard Mumma, class of 1926, was awarded this prize.

**GENERAL SOCIETY, SONS OF THE REVOLUTION CUP**

A cup has been presented to the Naval Academy by the General Society, Sons of the Revolution, and remains here. Each year the name of the midshipman who is most proficient in practical ordnance and gunnery is inscribed thereon. The name of Midshipman Clifford Henderson Duerfeldt, class of 1926, was inscribed on the cup.

**NATIONAL SOCIETY, DAUGHTERS OF THE AMERICAN REVOLUTION SWORD**

A sword is presented each year by the National Society, Daughters of the American Revolution, to the midshipman who excels in practical seamanship. Midshipman James Sargent Russell, class of 1926, was awarded this prize.

**THOMPSON PRIZE**

A navigating sextant is awarded by Col. Robert M. Thompson to the member of each graduating class who proves himself most proficient in practical and theoretical navigation. Midshipman John Sylvester, class of 1926, was the recipient of the sextant.

**VAN DYKE PRIZE**

A gold watch, suitably inscribed, is presented by Dr. Henry Van Dyke to the member of each graduating class who submits the best original article or theme on any naval or equally patriotic subject. Midshipman Jackson Aaron Lahn, class of 1926, was awarded the prize.

**GARDNER L. CASKEY MEMORIAL PRIZE**

A watch, known as the Gardner L. Caskey memorial prize, is presented each year to the midshipman who graduates at the head of his class for the course. The watch was awarded to Midshipman John Sylvester, class of 1926.

**MAURY PRIZE**

A pair of marine binoculars, known as the Maury prize, is presented by the United Daughters of the Confederacy to the midshipman of the third class who excels in physics. Midshipman Charles Robert Watts, class of 1928, was awarded this prize.

**THOMPSON TROPHY CUP**

A cup, known as the Thompson trophy cup, has been presented to the Naval Academy by Col. Robert M. Thompson, class of 1868, on which is inscribed each year the name of the midshipman who shall be declared by the executive committee of the Navy Athletic Association to have done the most during the year preceding for the promotion of athletics at the Naval Academy. This cup was awarded to Midshipman William Weaver Rutledge, class of 1926.

**NAVY ATHLETIC ASSOCIATION SWORD**

A sword is presented at the end of each academic year by the Navy Athletic Association to the midshipman who is considered to have personally excelled in general athletics during that year. Midshipman Royce Norwood Flippin, class of 1926, was awarded the sword.

**NATIONAL ASSOCIATION OF MUTUAL SAVINGS BANKS' PRIZE**

The National Association of Mutual Savings Banks has offered an annual prize of \$100 for the best original essay on a theme relating to thrift and savings written by a member of the graduating class. Midshipman John O'Shea, jr., class of 1926, was the winner.

**THE NEW YORK TIMES' PRIZE**

The New York Times has offered an annual prize consisting of a gold medal and a cash award of \$250 to the midshipman of the United States Naval Academy showing by a competitive examination the broadest knowledge and most intelligent understanding of current events, both domestic and foreign. Midshipman Charles Robert Watts, class of 1928, was the winner.

**LETTERS OF COMMENDATION AND APPRECIATION**

In accordance with Naval Academy Order 15-25, letters of commendation and appreciation were addressed to the below-named midshipmen of the class of 1926, they having contributed most to the development of naval spirit and loyalty within the regiment during the academic year 1925-26:

James Andrew Greenwald, jr.  
Royce Norwood Flippin  
Charles Huntington Lyman, 3d

Marvin Pabodie Evenson  
Charles Emil Briner  
George Calvin Weaver

**HARVARD SHIELD**

The numerals of the class of 1929 were engraved on the "Harvard Shield," which was presented by the Associated Harvard Clubs, as that class which excelled in interclass athletic contests during the past year.

**CRENSHAW CUP**

The name of Midshipman Cornelius Samuel Seabring, class of 1927, was inscribed on the Crenshaw memorial cup for 1926. This cup was presented by Mr. E. A. Crenshaw and upon it is to be inscribed each year the name of the coxswain of that eight-oared crew winning the greatest number of races for that year.

**LYSISTRATA CHALLENGE CUP**

The race for the "Lysistrata challenge cup" was not held during the summer practice cruise, 1926.
